CREATING A NEW FREELANCER PROFILE

Creating a lasting first impression is important! It is time to make a profile that stands out and showcases your talent.

1. Take a moment when creating your profile so that it shows who you are and who you want to portray to your potential clients
2. Add links to your professional networks and any credentials you have obtained
3. Add skills you have to make it easy for Companies to search and find your profile
4. In your description, highlight the industries you've worked in, the roles you've held and what makes you stand out
5. Put up a professional picture that clearly shows your face so past colleagues can recognize you
6. To keep our platform secure, we will ask you to verify your ID
